

Project on Center for Autism

Autism is a unique disorder with a myriad of challenges for those living with it. The Project on Autism is aimed at empowering individuals with Autism Spectrum Disorder, and their families, to fully participate in their communities. Pakistan House is establishing a Center for Autism in Islamabad that will provide Autism support services to the children and families living with an Autism Diagnosis. Center for Autism will strive to directly empower, educate, and support families living with autism and to provide opportunities for meaningful participation in the community. The Center will take initiatives to provide educational outreach that foster greater awareness and understanding of autism in Pakistani communities.
